- Information architecture
- Wireframing & prototyping
- UI & design systems

## TOOLS

- Figma, FigJam
- Framer, Webflow
- Claude, ChatGPT

## LANGUAGES

- English
- Hindi

## PROFILE

Final year UX & UI design student at Chitkara University. I research, design and prototype digital products, from apps to browser extensions to wearables. I care about grounding every decision in real user research and turning it into interfaces that are clear, honest and easy to use. Looking for design internships and junior roles.

## PROJECTS

### Vigil

Team of 2 · 4 weeks

Job search assistant · Extension, web, mobile

- Surveyed 27 students and ran 8 interviews across 3 cities to map what happens after students apply.
- Narrowed 20 ideas to 5 features with MoSCoW and designed 77 screens across three devices.
- Usability tested with 3 students and found 8 issues to fix in the next version.

### PHASE

Team of 2 · 5 weeks

ADHD wearable · Wristband, mobile

- Interviewed students with ADHD, consulted clinicians and compared 10 existing products.
- Designed an energy-aware wristband and app with voice task capture and gentle 5 minute pulses.
- Delivered a 41 slide deck, an A0 poster and a 40 page book.

### Yield

Solo · 5 weeks

AI productivity tool · Chrome extension, web

- Interviewed 9 people across 5 user groups and chose freelancers as the primary user.
- Took 450 ideas down to one core loop and built a 27 screen working prototype.

### Unify

Team · 4 weeks

Omnichannel campus system · Web, mobile, kiosk

- Researched students, faculty and admin staff and built 3 personas.
- Designed one QR student ID with live bus tracking, smart alerts and a help desk.
